ENGELSMANN // NEWS

Dear readers,

Round screening machines made by Engelsmann - yes, you read that right: our future is going to be round. We want to share this sensational little bit of industrial news exclusively with our newsletter subscribers today. You can find out what makes the round new arrivals to our family of screening machines so special and where you can see them in action in this new POWTECH edition of our newsletter.

You want clean, not just well-rounded affairs? Then you should definitely visit us in Nuremberg and learn about our new Hygienic Design range.

We wish you happy reading.
Your Engelsmann team

Rounded off: our Range of Screening Machines is Complete!

Engelsmann is rounding off its range of screening machines - in the truest sense of the word: we're completing our range of screening machines with the newly-developed round screening machine **JEL VibRS**, and we're able to supply our customers who only like round things with a high-performance round vibrating screening machine straight away - and it's at the usual high Engelsmann quality.

The first public appearance of our new arrival at the POWTECH trade fair is not to be missed. Come to our booth (4A-323) and see this new round vibrating screen in action for the first time.

As a subscriber to our newsletter, you're here with us right from the beginning of this new screening machine's life, and you now have the opportunity to learn about the benefits of the JEL VibRS. The product page is now online. Be one of the first visitors!

Clean Things: Big Bag Handling in HD

“Let’s show what we can do!” - rarely has this trade fair philosophy been lived out in such a way as it will at Engelsmann’s appearance at this year’s POWTECH trade fair.

We’re answering the question of how to demonstrate the full range of functions and industrial variety when it comes to big bag emptying with two exhibits: one emptying system for the chemicals sector, and one Hygienic Design (HD)-version for applications in the food and pharmaceuticals sectors where ease of cleaning and protection from contamination are paramount. Be won over by the new hygienic features and discover the diverse range of optional features for our big bag emptying systems live in Nuremberg. You can find more preliminary information on our website.

Your Ticket for POWTECH

You'll see that our booth at this year's POWTECH is well worth a visit: along with the launch of our round screening machines and our new range of hygienic big bag emptying systems, as well as our classic screening machine "JEL Konti", you can expect fascinating discussions with experts about red-hot news from throughout the world of bulk solids processing.

Contact our trade fair team and secure your free POWTECH ticket. We're looking forward to seeing you at booth 323 in hall 4A.
