

October // 18

A banner image with a dark background. On the left, the word "ENGELSMANN" is written in large, white, bold, sans-serif capital letters. Below it, the word "NEWS" is written in a smaller, white, bold, sans-serif font, preceded by two slanted red parallel lines. The right side of the banner is filled with a dynamic, abstract pattern of red and blue particles, resembling a dust or powder explosion.

ENGELSMANN // NEWS

Dear readers,

There is a very special reason for today's bonus edition of "Engelsmann **News**":

As soon as next week, an important event for the bulk material handling industry will be taking place - the SOLIDS in Dortmund. The highlights at Engelsmann's fair stand are not to be missed by any means:

Experience up close why the brand new version of the JEL Konti vibro sifter meets the highest hygiene standards, or how big bags can be emptied quickly and economically.

» [Even more Comfortable, even more Hygienic: JEL Konti 2.0](#)

» [All-in-one: Big Bag Station for all Occasions](#)

» [SOLIDS: Be our Guest](#)

We wish you happy reading.

Your Engelsmann team

Even more Comfortable, even more Hygienic: JEL Konti 2.0

In keeping with the motto “Your wish is our command”, our research and development department has reviewed our classic JEL Konti sifter and developed it further based on the reports of selected customers:

Lighter covers with ergonomic grips enable easier control of the machine. The inner workings of the new JEL Konti are convincing too: thanks to increased radii and a sieve trough free of dead spaces, the vibro sifter meets the highest hygiene requirements and can be cleaned quickly without leaving any residues.

Experience the new JEL Konti live at our stand at SOLIDS. Don't want to wait that long or can't make it? Then learn more by visiting our new product page.

All-in-one: Big Bag Station for all Occasions

What is most important to you when emptying big bags? A dustfree emptying process, emptying that is exact to the gram, or the most economical solution possible for simple tasks?

At our SOLIDS stand you will find all of that, because in just one big bag emptying station we have combined almost all the features that Engelsmann offers within the scope of the JEL Basic and PremiumLine series - from the feeding of the station to the emptying and discharge of the product to the downstream processes.

We invite you to personally get to know our world of big bag emptying in person at SOLIDS or right now on our website.
