

Dear readers,

Do you think of Nuremberg and think not only of lebkuchen, sausages and soccer, but also of bulk solid technology? Well, join the club! From 26 - 28 September, POWTECH 2017 opens its doors in Nuremberg once again. The leading international trade fair for bulk solid handling is also the ideal platform for Engelsmann to present our new product innovations.

Today's special edition of "Engelsmann **News**" gives you a sneak preview of what you can expect from our booth at the fair. We can promise you this: There has rarely been so much news to report.

- » [Slick Sieving with The New Konti](#)

We hope you enjoy reading.

Your Engelsmann team

Slick Sieving with The New Konti

There's news to report from the Engelsmann development department: Over the last few months the **JEL Konti** vibro sifter machine has been reworked, with a focus on user friendliness above anything else. The result: Even simpler handling thanks to toolless operation which facilitates an even faster screen change and optimum cleaning.

We are particularly proud of the pharma version with special hygiene design that we will be presenting at the POWTECH “**Special area: Focus pharmaceutical solids**” Intrigued? Then dare to take an early look at the new JEL Konti.

Guide: Big Bag Emptying from A-Z

The reliable emptying of big bags and the efficient removal of the emptied products during production is especially dependent on the big bag emptying station used. Only when it is designed to meet the needs can big bags be emptied quickly and completely - even with difficult products.

If you want to find out which emptying station is perfect for your needs, and which aspects play a role in this, then don't miss the guide that have been created by our bulk solid experts. Visit us at POWTECH to get more personalized advice. As preliminary information, we have put excerpts from our guide on our website for you - it's well worth taking a look.

Even More Flexible: The New JEL BasicLine

The big bag emptying station **JEL BasicLine** is predestined for emptying, where a cost-effective use of the machine is in the foreground. Now the basic model is supplemented with new features: Optional spring lift, a weighing module, as well as a vibrating table as an emptying aid allow the user to immediately adapt the emptying station to their own individual production process.

Get an idea of the new JEL BasicLine - or even better come directly to our booth at the fair or take a look at our website beforehand.

Your POWTECH Visit is on us

Also this year at POWTECH, you will see that Engelsmann has even more exciting new innovations to offer. Alongside interesting talks about screening technology and big bag handling we are happy to offer you, like every year, a tasty culinary tidbit from the Rhineland Palatinate region of Germany.

Are you planning a trip to the trade fair? Then be our guest. Simply contact our trade fair team and get your free entry ticket.

Find us in **Hall 4A at Booth 323**, as well as at the 'Special area: Focus pharmaceutical solids' in Hall 3A Booth 10.

We're looking forward to your visit.
