

## Double Cone Mixer

### ► JEL DKM

The standard double cone mixer JEL DKM is designed for mixing, homogenizing and dyeing of powdery or granular products up to a nominal volume of 10,000 liters.

### ► Operation

Due to the rotation of the mixing drum, the product is gently moved from the cylindrical part into the conical part and vice versa and uniform three-dimensional mixing of the material is obtained. As a result, the material lifted by centrifugal and frictional forces slides down according to its angle of slope.

### ► Machine or plant equipment

The JEL DKM consists of a mixing drum, two supports and a slip-on gear unit.

### ► Areas of application

Chemicals	Plastics	Pharmaceuticals	Foodstuffs	Similar industries
•	•	•	•	•

### ► Bulk solids

Grainy	Powdery	Finely powdered	Fatty	Granular
•	•	•	○	•

### ► Application processes

Mixing	Homogenizing	Dyeing
•	•	•

- 1 Robust execution
- 2 Low dynamic forces

- 3 Simple handling
- 4 Proper emptying almost residue-free

- 5 Gentle mixing due to inclined surfaces
- 6 Easy to transport and to maintain

## Double Cone Mixer

### ► Design

- Standard design of steel (stainless steel and titanium possible)
- ATEX or GMP version available
- Automatic feeding and emptying available as an option
- Manual and automatic operation
- Batch operation
- Upon request with spraying device for CIP cleaning
- Rotary inlet allowing for spraying in liquid or gaseous media

### ► Technical details

Model	Nominal volume/ content (l)	Driving power (kW)**	± d1 (mm)	± d2 (mm)	± d3 (mm)	Height h1 (mm)	Height h2 (mm)	Height h3 (mm)	Height h4 (mm)	Length l1 (mm)	Length l2 (mm)	Total weight (kg)
DKM 100 *	70	0.55	600	300	150	1450	950	500	500	1200	730	250

## Convincing facts

- ✓ User-friendly and low-maintenance operation
- ✓ Gentle product handling during the mixing of components
- ✓ Uniform mixing of the material
- ✓ Robust and compact design
- ✓ Intensive mixing effect even when adding low quantities of additives or ingredients
- ✓ Low dynamic loads
